Delivering Results in Iraq

While US involvement in Iraq may be well out of the current American news cycle, vital work is still ongoing to strengthen local infrastructure, train Iraqi military and police personnel, and maintain strong economic development. All of which poses extraordinary logistical challenges. As the most seasoned and successful logistics provider operating USG programs in Iraq, we’ve been answering the call for 20+ years.

Dating back to just before Operation Iraqi Freedom in 2002, Logenix has proven what highly reliable, cost-effective service under pressure looks like in practice. We’ve delivered thousands of USG shipments to Iraq, serving routes originating from over 40 countries and totaling nearly $1B in total value. Most recently, we successfully delivered a variety of highly sensitive shipments on behalf of the US State Department. For our client, success in Iraq depends on enlisting a partner with the vast capability and experience necessary to execute despite challenges inherent to the region.

Since 2018, that partnership has led to the safe transport of over 496,000 lbs of shipments in the region. With cargo ranging from temperature controlled pharmaceutical supplies and medical equipment to essential protective gear, training equipment and telecommunications equipment, we’ve continued to demonstrate why regional experience is critical to overcoming the obstacles that stand between crucial supplies and the people they’re intended to support.

Over the years, Logenix has helped strengthen nascent Democratic processes through the successful delivery of time-sensitive materials required by local elections. We’ve ensured the integrity of cold-chain dog food shipments destined for bomb-sniffing dogs in Baghdad. Logenix has even safely navigated one of Iraq’s most notoriously dangerous regions, delivering shipments of building supplies to aid in the construction of the Al Karkh water plant.

Our ability to serve Logenix clients efficiently, consistently and safely in and around Iraq has been recognized by organizations and institutions we’re proud to work alongside, including the US Air Force, Voice of America, Coalition Provisional Authority, and the US Agency for International Development.
Accelerating Aid in the DRC

In the global fight against HIV, malaria and tuberculosis, the impact of USAID & The Global Fund is virtually unmatched. Responsible for a combined investment in excess of $10 billion in aid yearly, their collective commitment to strengthening health infrastructure around the world has impacted countless lives.

In the Democratic Republic of Congo (DRC), hospitals throughout the country are in desperate need of this type of support, particularly in the post-COVID era. Since 2018, Logenix has provided services to dozens of clients to execute mission-critical contracts in the DRC.

Since 2018, we’ve successfully delivered a combined 3 million+ kgs of supplies including HIV test kits, ARVs, medicine, books, masks, gloves, medical gowns and much more. Originating from countries including Austria, China, Singapore, Germany, the UAE and the United States, these shipments provide indispensable support to hospitals, schools and clinics all-across the DRC.

Keeping these life-saving wheels turning in the DRC means meeting myriad challenges with confidence and poise.
The first is geographical. The middle of the DRC is dense tropical rainforest, making the region completely impassable by truck. Moving shipments reliably from one side of the country to the other brings more complexity than initially meets the eye.

For example, while the Western region of the DRC is accessible via the Matadi port, reaching the country’s landlocked Eastern border requires entering through either the Dar es Salaam Port in Tanzania or the Mombasa Port in Kenya.

With that in mind, import regulations in the DRC can be both hard to anticipate and highly costly if not handled properly. Insurance mandates without advance notice and the inefficiencies of local customs offices can extend delivery delays as long as 100 days.

Where other logistics providers might opt to wait, our destination storage solutions and dedicated agents make a world of difference. Not only does Logenix work on-site to help accelerate documentation approval, but our vast global network of storage providers allows for safe, reliable warehousing of goods until the consignee is able to receive.

Whether it’s navigating complex international lanes, executing last mile deliveries among unexpected regional civil unrest, or maintaining high visibility and consistent communication in regions known for unreliable infrastructure and internet coverage, Logenix is proud to help uphold life-saving missions, one safely delivered shipment at a time.
